FOR IMMEDIATE RELEASE

Free Prescription Drug Program Uses Internet To Deliver Cards – Offers Assistance to Uninsured

Individuals and Families can immediately download a free discount card via the Internet to reduce the cost of common prescription drugs

September 28, 2007 -- Elations Health LLC located in Wheaton, Illinois today announced the launch of their new discount card website www.easydrugcard.com to help reduce the high cost of prescription drugs. Elations Health LLC is providing free personalized prescription drug discount cards available for immediate internet download that offer savings averaging 31% off the price of most commonly prescribed drugs.

Individuals and families seeking financial relief from the increasing cost burden of prescription drugs can take advantage of this program instantly and free of charge. The cards benefit those currently uninsured or that lack a prescription drug benefit through their existing insurance company. Individuals with high deductible health plans (HDHP) or health savings accounts (HSA) will also benefit from the use of the cards by lowering their overall drug expenditures. The personalized cards are distributed electronically through the company's website at www.easydrugcard.com and are available to anyone regardless of age, income, or existing health insurance coverage.

Marianne G. Morgan, President of Elations Health LLC stated "We want to provide a convenient solution to assist consumers with immediate relief to their already overburdened healthcare dollar. By offering our no cost Easy Drug Card via the Internet we have eliminated the wait time associated with mail delivery for folks looking to save money on needed medications today."

The prescription discount cards are honored through a national network of over 56,000 participating retail pharmacies including Walgreens, Osco Drug, Dominick's, and CVS stores. The company's new website offers a pharmacy locator and drug pricing tool to locate a participating pharmacy within the user's own neighborhood.

To receive discounts on prescriptions, an individual simply enters their name and email address into an online form, downloads the personalized card to their printer, and present the card at a participating pharmacy with their prescriptions. Since this is not insurance there are no deductibles, no premiums, no membership fees, and no medication restrictions or limits on frequency of use with this program.

About Elations Health LLC

Elations Health offers a free personalized prescription drug card program via the Internet to provide substantial cost savings on prescription medications to individuals and families who lack health insurance or a prescription drug benefit with their existing health insurance. Individuals can download their free prescription drug card from www.EasyDrugCard.com to receive savings averaging 31% off the price through a national retail pharmacy discount drug network containing 56,000 pharmacies—including most major chains and thousands of independents. There are no deductibles, no premiums, no membership fees, and no waiting periods with the use of the free discount drug card.
