"It's certainly no secret that prescription drugs are often too expensive and out of reach," says Marianne G. Morgan, one of Easy Drug Card's executive team members, "especially for those who are not insured. People without insurance actually pay more than the insurance companies do for the same medications because no one has negotiated rates on their behalf. For over 8 years we have been able to tap into these pre-negotiated discounts and pass the savings on to our cardholders saving them millions of dollars in the process." She goes on to explain that Easy Drug Card is available to individuals and small business owners looking to save money for their employees. "We have tried to keep prescription drug prices within reach – especially for those that need them."
